## NPK water-soluble STARTER

15:30:15+2MgO+TE, 11:40:11+2MgO+TE and 13:40:13+TE

STARTER formulations 15:30:15+2MgO+TE, 11:40:11+2MgO+TE and 13:40:13+TE are excellent water-soluble NPK fertilizers with high phosphorus content. Due to balanced nutrient ratio, it is recommended for use on all crops. When applying at early plant growth stages, STARTER stimulates root system development, improves the uptake of nutrients and contributes to greater yields, since shortage of phosphorus in the beginning of plant development cannot be replenished at later stages. At budding/flowering stage, phosphorus, contained in STARTER grades, accelerates reproduction organs formation and improves yield commercial properties.
